Have you thought about implementing or migrating to Windows® 2000 or 2003 Active Directory or Exchange?

Talk to the experts!

Our consulting team will:

- Help you better understand the benefits of deploying Microsoft Windows® 2000/2003 Server and Active Directory™
- Assist in the development of in-depth Active Directory Designs for your environment
- Validate Active Directory / Exchange design developed by your team
- Provide your executive team with TCO benefits
- Establish a detailed budgetary design based upon the milestones of your project
- Reduce your total cost of entry
- Assist in the preparation, design and support of a Windows®2000/2003 Active Directory™ environment.

How can Rutter help you?

- Provide on site consulting services that includes a Windows® and Exchange 2000 or 2003 overview, implementation and server installation planning
- Active Directory™ Design, the core of the Windows® 2000/2003 environment.
- Migration strategy for deployment and support (all platforms)
- Implementation of advanced Windows® 2000(3)security features for secure environments
- Hands-on expertise and knowledge transfer
- Perform Security Audits for your environment
- Assist with the creation, deployment and management of GPO's
- Provide 3rd party administration tools to ease the GPO administration and management
- Recommend and/or implement Microsoft (AD) application management tools
- Audit your current Active Directory, Win2K(3) and/or Exchange environment
- Provide phone, on-site and remote support for your IT organization

Delivering and supporting technologies that match a companies overall business objective is a vital element to maintain strategy and vision. It's not just our goal to provide this value to you. It's our mission!
